

DataSturdy Product Catalog

Data Health Radar

Overview:

A healthcheck product for data platforms, databases, lakehouses, and data lakes.

It evaluates reliability, performance, governance, lineage, security, quality, and cost posture.

Core Highlights:

- Platform and database health assessment
- Data lake and lakehouse readiness review
- Governance, observability, lineage, and security coverage
- Risk radar and improvement backlog outputs

Replace this starter PDF with the final branded catalog when ready.
