

# Unlock the Power of SQL Server & Azure SQL Database

A Comprehensive Workshop on SQL Server 2019/2022 Features, Cloud Integration, and Data Management

Join this workshop to explore the latest SQL Server and Azure SQL Database features, designed for Database Administrators, Data Engineers, Business Analysts, and IT Professionals.

## Workshop Agenda

### 1. On-Premises SQL Server Deep Dive

- Arc Enabled SQL Server
- SQL 2019/2022 New Features
- Data Warehouse (EDWDWH)
- Accelerated Database Recovery
- SQL 2019/2022 Machine Learning Capabilities
- SQL 2019/2022 Data Virtualization
- SQL 2019/2022 Intelligent Query Processing
- Power BI Report Server
- Upgrade to SQL Server 2019/2022
- Data Security and Governance
- Database Auditing
- Demo for New Features Adoption (especially around HA/DR, In-Memory)

### 2. Azure SQL Database & Cloud Integration

- **Azure SQL Database:** Fully managed, scalable cloud database service.
- **Azure SQL Hyperscale:** Dynamically scale storage for large workloads.
- **Azure SQL Managed Instance (MI):** Enjoy full SQL Server compatibility with managed services.
- **Fabric Integration:** Seamlessly integrate on-prem SQL Server with Microsoft Fabric.

## Why Attend?

### Practical Experience

Work with the latest SQL Server and Azure SQL features.

### Boost Efficiency

Optimize performance and reduce downtime.

### Enhance Security

Strengthen data protection with modern strategies.

### Stay Competitive

Stay updated on the latest data management technologies.

### Maximize ROI

Leverage new features to improve your SQL Server investments.

## Who Should Attend?

- Database Administrators
- Data Engineers
- Business Analysts
- IT Professionals
- Anyone interested in data management and analytics
